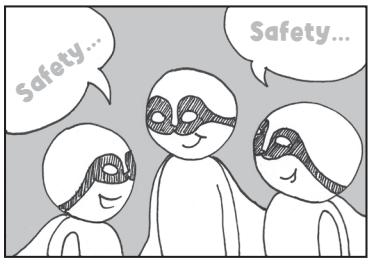
NONPROFIT SAFETY HERO

YOU CAN BE A SAFETY HERO!

Our mission is too important for accidents to get in the way.

3 things to KNOW:



1. TALK ABOUT SAFETY

Make safety a part of **everything** you do, and **talk about it a lot!** Every nonprofit is required to have either regular safety meetings or a safety committee, depending on how many employees you have.

2. LEARN ABOUT SAFETY

There are quick and easy ways to **learn safe practices**. Watch a short video to refresh your knowledge of things like first aid, fire safety, and ergonomics. **Nonprofit Safety Hero** offers videos, safety cards, online training, and more, absolutely free.

3. SHARE YOUR IDEAS

If you have ideas to improve safety at your organization, speak up! Every nonprofit is required to have a **Safety Bulletin Board** and a written **Accident Prevention Program**, and your contributions can make them more effective.
